

ems Heavy Duty Countdown Timer (15 amp. maximum)

ems product ID 120118

The ems heavy-duty count-down timer (120V) features:

- Automatic Shut-Off
- No Programming Necessary
- Single-Button Operation
- 120 Volts
- Clear Lighted Display
- Multiple Outlets
- Durable
- Lightweight
- Convenient
- Includes 8' power cord
- 15 amp maximum

OPERATING INSTRUCTIONS:

1. Push the button to activate the timer.
2. To keep the timer running *without* a time limit, push the button for 2 seconds and leave the indicator light at **HOLD**. To shut off the unit from this position, press the button once.
3. To activate the timer for a five (5) minute countdown, press the button once, until the indicator light stops at the **5 MIN** marker.
4. To activate the timer for a ten (10) minute countdown, press the button twice, until the indicator light stops at the **10 MIN** marker.
5. To activate the timer for a fifteen (15) minute countdown, press the button three times, until the indicator light stops at the **15 MIN** marker.
6. To activate the timer for a thirty (30) minute countdown, press the button four times, until the indicator light stops at the **30 MIN** marker.

When running, the indicator light will drop down at intervals, indicating how much time is left.

The unit will shut off automatically when the time has expired.

WARNING! Risk of shock. Do not use the timer to turn off power for maintenance (service, repairs, broken bulbs, etc.). ALWAYS turn off power at the service panel by removing a fuse or switching off a circuit breaker before doing any repairs.

CAUTION: This timer should not be used in precision timing applications where inaccurate timing could have dangerous consequences (i.e., sun lamps, saunas, etc).
